CAIO ALEXANDRE

SKILLS

I am a full-stack developer and a Software Engineering student at the University of Brasília, currently in my fourth semester. I have professional experience with Python, PostgreSQL, PHP, JavaScript and Bootstrap.

EXPERIENCE

Ernest Manheim, Campinas — *Software developer*

MAY 2021 – JUNE 2022

Development of an open source linguistic ethnography tool to frame public opinion in mediatized groups. The project was developed in a team of one developer, with the product being an open source tool aimed at linguists.

Python • Git • Pandas • NumPy • Plotly • spaCy

Tecnisys, Brasília — *Information systems developer*

JUNE 2022 – DECEMBER 2022

Development of the website for the Labor Department of the Government of the Federal District. The project was developed by a team of approximately 10 developers, with the client being the Government of the Federal District.

Main responsibilities:

- Development of new pages and features with Bootstrap
- Bug and vulnerability fixes
- Dashboard development using Grafana
- Deploy the application to the development environment using Jenkins

PHP • Git • PostgreSQL • JavaScript • Grafana • Jenkins • Bootstrap

EDUCATION

University of Brasília, Brazil — *Bachelor*

JUNE 2022 – PRESENT, BRASÍLIA

Graduating in Software Engineering, currently studying the fourth semester. I was an Algorithms and Computer Programming monitor during the 2022/2 and 2023/1 semesters, and I am currently an Object Oriented Programming monitor.
